For one of our esteemed clients Apple, we are looking to fill an IT Project Manager role based out of Sunnyvale, CA.

The duration of the engagement is 12 months, with the possibility of extension.

Job Title: IT Project Manager
Location: Sunnyvale, CA
Duration: 12 months

Job Role & Description:
- Must be goal-oriented, highly motivated and able to work under minimal supervision in a multi-functional environment at detailed levels
- Strong background in infrastructure project management including procurement, data center operations, & environment validation.
- Understands and deals well with rapid development cycles; remains flexible and calm in the face of ambiguity; drive clarity
- Effective presentation, oral, and written business communication skills with various audiences and levels
- Able to effectively interact, influence and communicate at various levels of the organization
- Effective decision-maker – balance risks and benefits for the overall good of Apple
- 7+ years of combined experience in systems engineering and project management

Description:
The Infrastructure Project Manager will track action items, prepare documentation, effectively communicate project status, and manage risk. This is a hands-on position where the Project Manager will be involved in analysis, testing, proof-of-concept, management of deliverables across the team.

- Lead multiple cross-functional projects by providing project leadership and daily management through the project life cycle
- Handle all aspects of project information including timelines, resource allocation, scope and definition
- Resolve cross-functional and business issues
- Actively seek problem resolutions
- Build positive relationships with multi-functional internal organizations
- Navigate and execute in an environment of ambiguity and lead teams to the successful delivery of solutions

Education & Experience:
_ BA/BS in Computer Science or related field with 5-7 years or equivalent experience. Project management certification a plus.
